The Justice 4 Grenfell Campaign (J4G) exists to campaign, lobby and challenge the responsible authorities to ensure that the interests and needs of those affected by the disaster are prioritised and justice is seen to be done, if necessary this will include taking appropriate legal action to support these aims. J4G is applying for Core Participation status at the Grenfell Tower Inquiry as part of our campaign to achieve justice for the victims, bereaved families, survivors and wider community.

JUSTICE 4GRENFELL

About Justice4Grenfell

Justice4Grenfell is an independent, community led campaign established by local people as a response to the Grenfell Tower fire disaster of 14 June 2017 in North Kensington. The tower block burnt for over 60 hours with hundreds of people and firefighters, despite their brave attempts to save lives, watching helplessly.

The current official figures have confirmed 80 people dead and 70 injured but many tenants are still deemed 'missing' and many others remain unidentified. A definite official death toll is likely to be announced at the beginning of 2018. Everyone is expecting the final total to be appallingly high. A greater tragedy is that every life could have been saved as the spread of fire was preventable.

The campaign was launched five days later, on 19 June, during a Walk of Silence supported by Michael Mansfield QC, an eminent human rights lawyer. The campaign has been established with 4 explicit aims:

- **To remember and honour** the names and lives of men, women and children - who lost their lives in the dreadful fire and the impact of the carnage on survivors and wider community.
- **Coordinate information** about legal rights, entitlements, hearings, processes and emotional support, including trauma, for those directly affected so that justice can be attained without delay and in an open and transparent manner.
- Develop a public interest campaign to **hold all the authorities and individuals to account** for their failure to provide safe homes, death of loved ones and lack of proper & effective response during and after the disaster.
- Create a **unified community voice** on this issue to ensure that we are properly consulted throughout the whole process; that lessons are learnt to avoid similar events and loss of life ever happening again.

Unite for Justice – Join the campaign

Endorsements

The **Hillsborough Justice Campaign** sends condolences and support to families and survivors of the Grenfell Tower fire. We offer you any practical support we can provide. We also state unequivocally that we will not stand by and watch any attempt at a coverup. The aftermath of this avoidable disaster must not be controlled by those who directly or otherwise were complicit in it. The consequences of a sustained war on the poor must be to hold those responsible accountable. We owe it to those who were killed.
